Syntax highlighting for OWL syntaxes

Eugeniu Costetchi

06/05/2020

Contents

Abstract

Listings-OWL is a `listings` extension to provide syntax highlighting for SPARQL 1.1 and the most in use OWL syntaxes. This library implements Turtle, Manchester, and Functional-Style OWL syntaxes.

1 Introduction

This library implements syntax highlighting for the most in use serialisations for OWL language.

To use the package download it first into the document folder and refer to it in the header as follows: `\usepackage{listings-owl}`

Then create your listing and indicate the language for highlighting. The possible variants offered by this library are: `SPARQL1.1`, `Turtle`, `SPARQL1.1`, `Functional-style` and `Manchester-syntax`.

2 Languages

This section demonstrates usage of the four languages each in a separate subsection. Each subsection comprises of a small example demonstrating the syntax highlight followed by the LaTeXcode to generate it.

2.1 SPARQL

```
PREFIX dc:  <http://purl.org/dc/elements/1.1/>
SELECT ?title
WHERE {
   ?x dc:title ?title
   FILTER regex(?title, "^SPARQL")
}
```

```
\begin{lstlisting}[language=SPARQL1.1]
   PREFIX dc:  <http://purl.org/dc/elements/1.1/>
   SELECT ?title
   WHERE
   {
      ?x dc:title ?title
      FILTER regex(?title, "^SPARQL")
   }
\end{lstlisting}
```

2.2 Functional-Style syntax

```
Prefix(:=<http://example.com/owl/families/>)
Ontology(<http://example.com/owl/families>
Import( <http://example.org/otherOntologies/families.owl> )

Declaration( Class( :Teenager ) )

SubClassOf( :Teenager
   DataSomeValuesFrom( :hasAge
      DatatypeRestriction( xsd:integer
         xsd:minExclusive "12"^^xsd:integer
         xsd:maxInclusive "19"^^xsd:integer
      )
   )
)
```

```
\begin{lstlisting}[language=Functional-style]
Prefix(:=<http://example.com/owl/families/>)
Ontology(<http://example.com/owl/families>
Import( <http://example.org/otherOntologies/families.owl> )

Declaration( Class( :Teenager ) )
```

```
SubClassOf( :Teenager
   DataSomeValuesFrom( :hasAge
      DatatypeRestriction( xsd:integer
         xsd:minExclusive "12"^^xsd:integer
         xsd:maxInclusive "19"^^xsd:integer
      )
   )
)
\end{lstlisting}
```

2.3 Manchester syntax

```
Ontology: <http://example.com/owl/families>

AnnotationProperty: rdfs:comment

Individual: John
    Types:
        Father,
        hasChild exactly 5 OWL:Thing,
        hasChild max 4 Parent,
        hasChild exactly 3 Parent,
        hasChild min 2 Parent
    Facts:
        hasWife  Mary,
        hasAge  51
    SameAs:
        Jack,
        otherOnt:JohnBrown
    DifferentFrom:
        Bill
```

```
\begin{lstlisting}[language=Manchester-syntax]
Ontology: <http://example.com/owl/families>

Individual: John
    Types:
        Father,
        hasChild exactly 5 OWL:Thing,
        hasChild max 4 Parent,
        hasChild exactly 3 Parent,
        hasChild min 2 Parent
    Facts:
        hasWife  Mary,
        hasAge  51
    SameAs:
        Jack,
        otherOnt:JohnBrown
```

```
    DifferentFrom:
        Bill
\end{lstlisting}
```

2.4 Turtle

```
@prefix : <http://example.com/owl/families/> .
@prefix owl: <http://www.w3.org/2002/07/owl#> .

<http://example.com/owl/families> rdf:type OWL:Ontology .

:toddlerAge rdf:type rdfs:Datatype ;
    OWL:equivalentClass [
        rdf:type rdfs:Datatype ;
        OWL:oneOf [
            rdf:type rdf:List ;
            rdf:first 1 ;
            rdf:rest [ rdf:type rdf:List ;
                       rdf:first 2 ;
                       rdf:rest rdf:nil
            ]
        ]
    ] .
```

```
\begin{lstlisting}[language=Turtle]
@prefix : <http://example.com/owl/families/> .
@prefix owl: <http://www.w3.org/2002/07/owl#> .

<http://example.com/owl/families> rdf:type OWL:Ontology .

:minorAge rdf:type rdfs:Datatype .

:toddlerAge rdf:type rdfs:Datatype ;
    OWL:equivalentClass [
        rdf:type rdfs:Datatype ;
        OWL:oneOf [
            rdf:type rdf:List ;
            rdf:first 1 ;
            rdf:rest [ rdf:type rdf:List ;
                       rdf:first 2 ;
                       rdf:rest rdf:nil
            ]
        ]
    ] .
\end{lstlisting}
```

3 License and contributions

Listings-OWL may be distributed and/or modified under the conditions of the LaTeX Project Public License version 1.3 or later. The Current Maintainer of this work is Eugeniu Costetchi (costezki.eugen@gmail.com), who welcomes contributions to the package on GitHub.

The goal of this library is to provide a toolkit to draw quickly and efficiently beautiful OWL diagrams. Building such a library can be challenging for one pair of hands alone. If you have used this library yourself or have seen it used, we would greatly appreciate your opinion and feedback . Please open a Github issue or privately email the Current Maintainer with as much information as you can.

We also welcome technical feedback and bug reports in the form of GitHub Issues and pull requests.

4 Long Examples

This set of long examples are possibly useful and should be removed from this document. They are kept currently for consultation and bug-fixing due to their extensive coverage of syntactic features. Their code is not provided but can be consulted directly in the LaTeXcode this document.
